DETAILED ACTION

This office action is in response to the RCE and Amendment filed 30 January 2004.

The 35 USC 103(a) rejection of Claims 4-6 as being suggested by Endo et al. (US 5709831) has been overcome by applicant's amendment.

Applicant's amendment is fully supported by the disclosure on pages 11 and 12 of his specification, in conjunction with Figure 6.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 4-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,596,211. Although the conflicting claims are not identical, they are not patentably distinct from each other because the specific directional movement of the instant claims is suggested by the claims of the '211 patent.

Allowable Subject Matter

In the event of a timely-filed terminal disclaimer, claims 4-6 appear to be in condition for allowance.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record neither teaches nor suggests the claimed method of molding and tentatively retaining a molded part to another molded part, including a step of moving at least one movable mold with respect to another movable mold by a predetermined amount greater than an amount of movement necessary for tentatively retaining one molded part to another molded part, in which the moving by a predetermined amount is in the same direction as said movement necessary for tentatively retaining one molded part to another molded part.
